

**Results of the Alumni Survey for  
2002-2003 Undergraduate Degree Recipients**

**for**

**School of Medicine**

**Alumni Profile  
and  
Comparative Analysis**

*Prepared by the Office of Information Management and Institutional Research*

*12/9/2004*

## Alumni Profile

Several charts on the following pages display "floating bars" that represent a 95% confidence interval for the population mean based on the sample of survey respondents. Specifically, the starting point of the bar represents the sample mean minus approximately 2 standard error units and the length of the bar represents approximately 4 standard error units (see technical note below for further details).

The floating bars give you a sense of how reliably the sample mean can be generalized to the population that these data are supposed to represent; that is, undergraduate degree recipients graduating during the 2002-2003 academic year. The width of the bar generally increases if the sample size decreases or the variation in answers to the item increases. More narrow bars would then occur for items with a larger number of respondents or smaller variation among responses.

The floating bars are particularly useful in comparing differences across items. If the bars overlap, then the apparent differences in means are not statistically significant. If the bars do not overlap, then the difference is statistically significant at the  $p < .05$  level. The reader should note that this is a somewhat conservative test of statistical significance, as explained further in the following technical note.

### **Technical Note**

The mean confidence interval uses the t-value associated with a probability level of 0.05 and the degrees of freedom appropriate to each item (i.e.,  $n - 1$ ). For example, for an item with 1000 respondents ( $df = 999$ ), the corresponding t-value is 1.9623. The mean minus the standard error (standard deviation divided by the square root of the number of respondents) is the starting point for the bar, and  $2 \times 1.9623 \times$  the standard error is the width of the bar.

Since the item confidence intervals are based on item standard errors, using the non-overlap of bars as an indication of a statistically significant difference is more conservative than a t-test between the two items. This is because the corresponding t-test would employ a pooled estimate of the standard error which would generally be lower than the individual item standard errors. The conservativeness of this test is more than offset by the large number of items that one can compare across this survey. Therefore, readers should still interpret these differences conservatively.

The results for the following Alumni profile are tabulated using the responses from 54 Alumni.

**Employment**

**Current Employment Status**

	TOTAL		BACH		ASSOC

### Campus Climate for Diversity<sup>c</sup>

**Bach** ■ **Assoc** □

For the purposes of this survey, "diversity" and "backgrounds" refers to differences among people in at least gender, race/ethnicity, sexual orientation, religious beliefs, socio-economic class, age, learning style, and disabilities

Please indicate how often you have experienced each of the following while enrolled at IUPUI

	TOTAL	BACH	ASSOC
Participated in classroom discussions that included contributions from students from diverse backgrounds	2.09	2.57	1.87
Socialized with students from backgrounds different than your own	1.80	<b>2.86</b>	<b>1.32</b>
Had classroom experience that enhanced understanding of people from diverse backgrounds	1.53	2.00	1.32
Took a class that increased your understanding of multiculturalism and diversity	0.96	1.29	0.81
Attended campus events & activities that increased your understanding of diversity	0.49	0.86	0.32
Felt a sense of negative conflict between diverse groups on campus	0.29	0.43	0.23
Saw or read racist, antigay or sexist material on campus	0.27	0.57	0.13

<sup>c</sup> Responses provided on a 5-point scale where 0=Never, 1=Rarely, 2=Sometimes, 3=Often, and 4=Very Often.

Note: Differences in **bold** mean values are statistically significant at  $p < .05$  as indicated by the non-overlap of bars in the adjacent chart. See text box at the beginning of the report for further discussion of this significance criteria compared to the traditional t-test.

**Climate for Diversity (Bachelors)**

<i>Indicate how often you have experienced each of the following while enrolled at IUPUI:</i>	Number of Respondents					Percentage				
	Never	Rarely	Sometimes	Often	Very Often	Never	Rarely	Sometimes	Often	Very Often
Socialized with students from backgrounds different than your own	0	1	5	3	5	0%	7%	36%	21%	36%
Participated in classroom discussions that included contributions from students from diverse backgrounds	0	1	5	7	1	0%	7%	36%	50%	7%
Had classroom experience that enhanced understanding of people from diverse backgrounds	0	3	8	3	0	0%	21%	57%	21%	0%
