The *Graduation Rates Report* is derived from the Retention Tracking System and is intended as a companion to the *Undergraduate Retention Report*. The cohorts consist of degree-seeking students who initially enrolled in the First Semester, and students who entered in the Second Summer Session and re-enrolled in that First Semester. Cohorts are identified by their First Semester enrollment (1986-1988). Course load status (FTB, FTT, PTB, PTT) is calculated on credit hours attempted in the student's initial First Semester of attendance. The receipt of any degree (cert., assoc., bach.) is a positive outcome. The Full-Time Beginner category was developed for compliance with the Student Right to Know Act.

Chart 1 - Full-Time Beginners (FTB) Graduation Rates Comparison

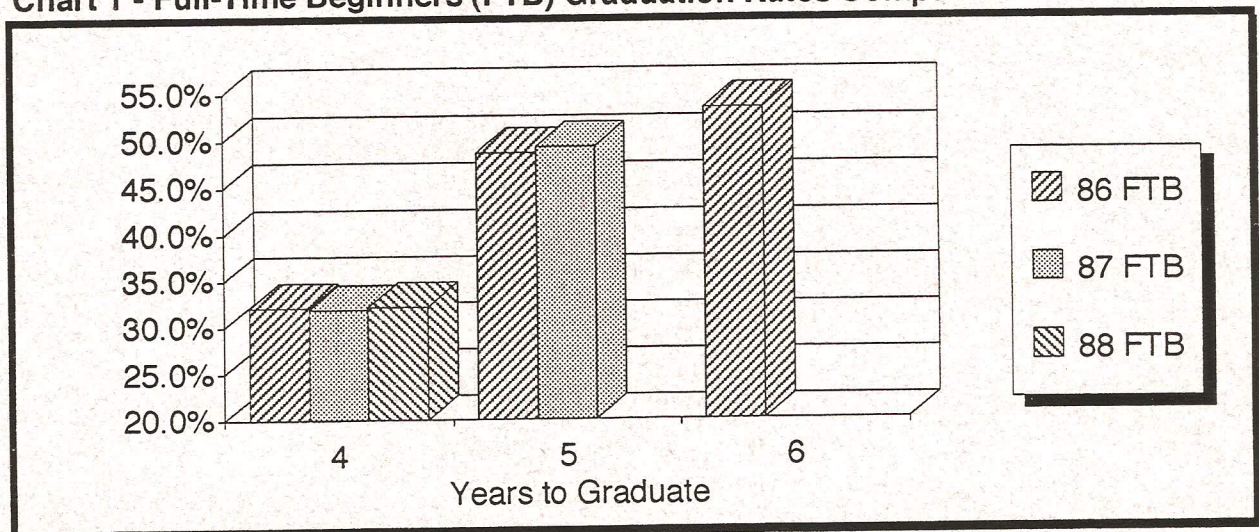

Chart 2 - Graduation Rates by SAT Category for FTB

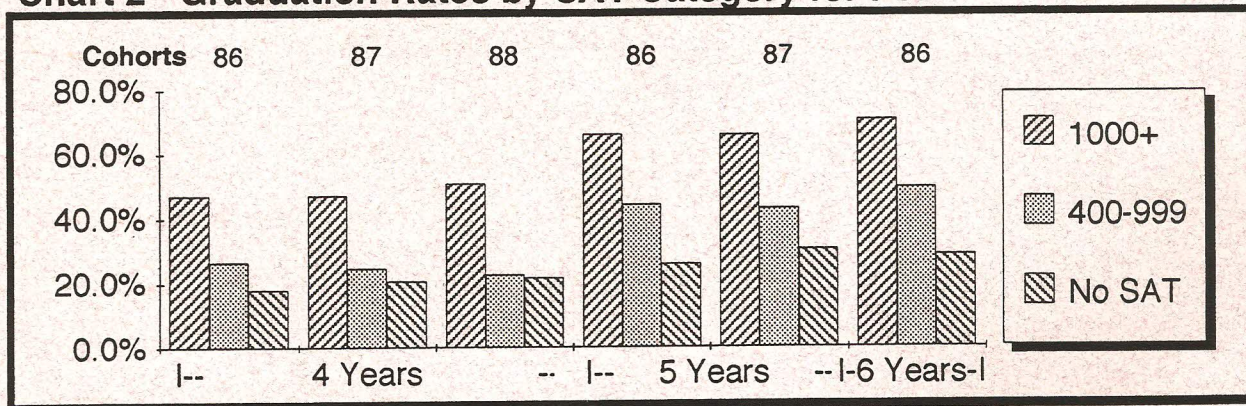

Chart 2 illustrates graduation rates by SAT category. The "No SAT" group consists of students with just ACT scores and students without a standardized admissions test score who were admitted at least three years after completing high school.

The table below examines graduation rates and average time to graduation by various categorical distinctions. The breakdown by age can be considered an approximation of the New Majority / Traditional student distinction as full-time beginners, 20 or more years of age, parallels the New Majority definition.

The table above provides a campus comparison of graduation rates and average time to graduation for Full-Time Beginner students. The 1986 cohort is extended to six years which will provide the data for compliance with the Student Right to Know Act. Campuses will be responsible to publish these figures for incoming students.

The tables on the following pages are dedicated to individual campuses and provide graduation rates data by various categories.
