

This report provides the six-year graduation rates for the 1986 and 1987 cohorts based upon the most current Student-Right-to-Know Act (SRKA) proposed regulations. Comparable four and five year rates are provided for the 1988 and 1989 cohorts. The SRKA methodology establishes full-time beginners (FTB) as the student cohort for reporting purposes. This report provides separate analysis by ethnicity, gender, age, and SAT score for the 1986 and 1987 FTB groups. On the facing pages, the 1986-89 cohorts graduation rates are provided by entry status and first semester course load.

Each line of the report provides the number that began, the number of students who received certificates within 1.5 years, associate degrees within 3 years, the number and percentage of students who received baccalaureate degrees within 4, 5, and 6 years. The "total %" is the sum of the reported certificate, associate, and baccalaureate degrees divided by the number that began.

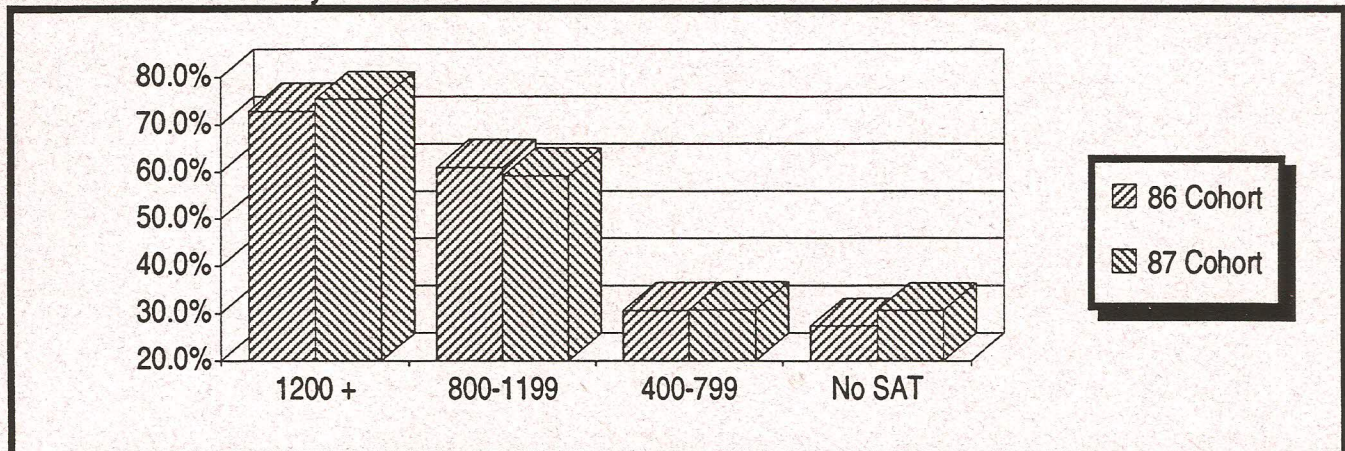

At the system level, the FTB graduation rate improved slightly from 51.5% to 51.7% for the 1986 and 1987 cohorts, respectively. The first graph below illustrates the percentage of FTB students receiving baccalaureate degrees within 4, 5, and 6 years for all available cohorts. The percentage of students receiving baccalaureate degrees in four years has risen from 28.9% to 29.7%. The second graph displays the graduation rates of students by SAT scores. As expected, the relationship between SAT scores and graduation rates is positive.

Among the campuses, Bloomington, East, Northwest, and Southeast all realized gains in graduation rates from the 1986 to 1987 cohorts. Campus specific pages follow the system graduation rates.
