

This report summarizes the data submitted to IPEDS with the Graduation Rates Survey. The graduation rate population is defined as full-time beginner, degree-seeking students who began in the fall of 2005, or in either of the preceding summer sessions.

The first table below shows the overall graduation rates for the 2005 cohort. These rates provide the number of students who earned any degree within 150% of program length. New to this view is the "Transfer Out Rate" which represents the percentage of IU non-completers that showed subsequent enrollment and/or degree completion at another institution. Appendices B & C provide more detail on the outcomes of IU non-completers and their destination institutions.

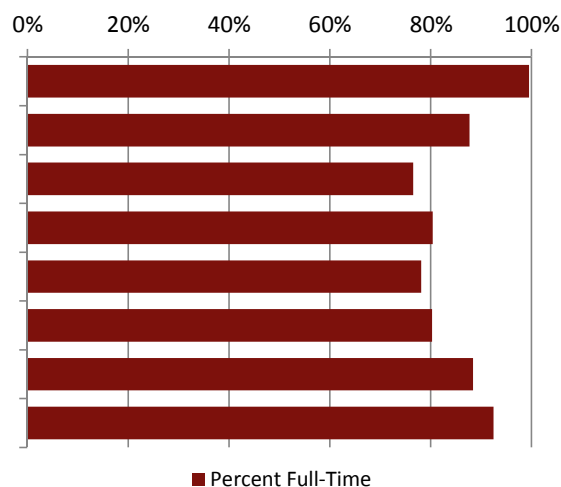

The second table on this page illustrates the composition of the 2005 cohort of beginners, and demonstrates the diversity of students served by the campuses of IU, and by extension, the representativeness of the graduation rates measure. For example, nearly all Bloomington beginners start their academic careers as full-time students while less than 80% of the beginners at IU East are full-time in the fall. Moreover, many of the students tracked for graduation rates reporting at IUPUI and the regional campuses do not maintain that level of coursework throughout their education.

The table below shows completers by degree granting campus. This is divided between those students who originally enrolled at the degree granting campus (Home Campus) and those who migrated to complete a degree at another IU campus (Destination IU Campus). For example, there were 4,974 degrees granted at Bloomington to full-time beginner students in the 2005 cohort, of which 4,756 started and finished at Bloomington, and 218 started at Bloomington but finished at another IU campus.

The chart below shows the distribution of degrees by campus for those students who obtained their degree at an IU campus other than the original campus of enrollment.

The tabular data below illustrates the overall graduation rates by various characteristics for the 2005 beginner cohort, and for comparison purposes, the most recent historical cohort. This IU total view does not include any IU mission students at IPFW.

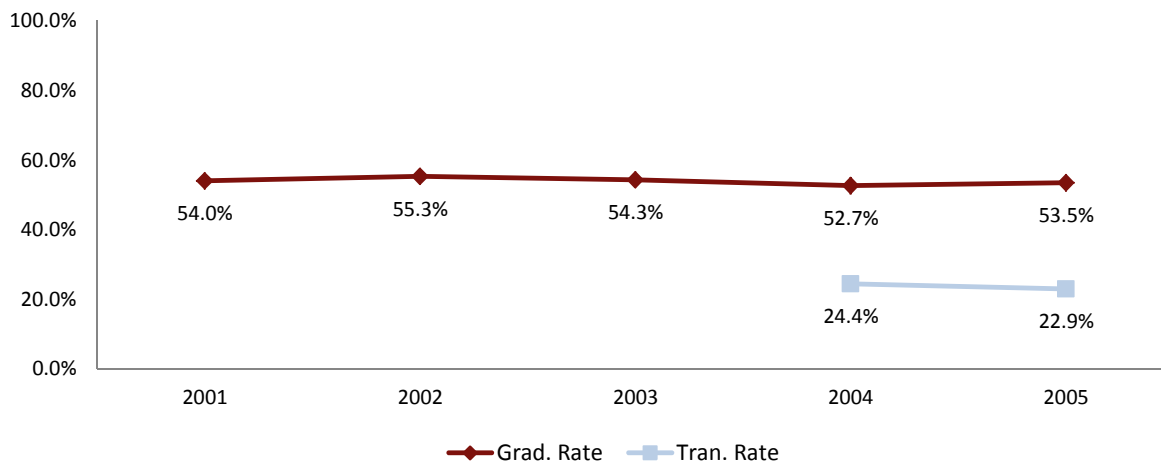

The chart at the bottom of the page reflects the five year history of overall graduation rates. Beginning with the 2004 cohort, transfer out rates are provided.

APPENDIX A

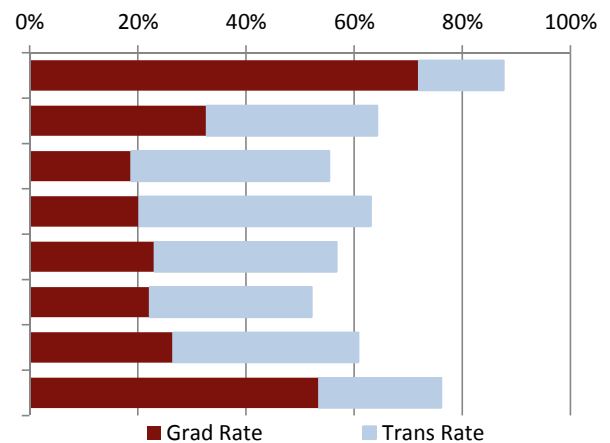

This appendix summarizes the data submitted to external groups (e.g. USNWR, NCAA) which defines the population as full-time beginner, *bachelor's degree seeking* students who received a bachelor's degree within six years. This is a "sub-group" of the overall graduation rates cohort illustrated in the body of the main report.

The first table below shows the graduation rates for the 2005 cohort. These rates provide the number of students who received a bachelor's degree within six years at IU or transferred to another institution.

The second table on this page explores the composition of the 2005 beginner cohort. These figures and chart illustrate the proportion of the incoming beginners as a percentage of the total cohort, and reflect the representativeness of the graduation rates as a measure of success.

APPENDIX B

The tabular data below illustrates the top five transfer destination institutions for IU and each campus. The outcomes include degrees earned within 150% of program length, degrees earned beyond 150%, and enrollments without degrees within the six year window prescribed for external reporting. The "Rate" indicates the percentage of total transfers out represented by each institution.

APPENDIX C

The table and chart below provides a slightly different view of outcomes than required by IPEDS reporting. By leveraging data from the Student Tracker system of the National Student Clearinghouse (NSC) we can establish the destination and degree attainment of non-persisters.

The first table summarizes the outcomes of the 2005 cohort of full-time beginners. On the left are the outcomes attributable to IU; graduates within the 150% of program length, those that finished a certificate or associates degree beyond the 150% window, and those still enrolled at IU in the fall of 2011. The right side of the table illustrates the outcomes known through matching with the NSC data which includes completing a degree on-time at a transfer institution, degree completion beyond 150%, and enrollment at a transfer institution without degree completion through the sixth year. The chart at the bottom of the page reflects these outcomes including the percentage considered "Non-Completers" who have not transferred away from IU or were not still
