

This report provides views on persistence to the second semester for the incoming full-time, beginner cohorts of 2001, 2002, and 2003. Consistent with our cohort logic, students are defined to a cohort based upon their entry semester/status (fall or either previous summer session/degree-seeking beginner or transfer) and/or by their high school graduation date when appropriate.

As with the fall to fall report, exclusions to the student cohorts (i.e. death, military service) have been added to the standard report view. Managing and accomodating these exclusions will provide a more accurate view of persistence but may also change previously published figures. Also new to this report are views by intended degree and by high school diploma type for resident students. These have been added to respond to external agencies.

An appendix (13.2.1) is available which provides views on the entire beginner cohorts and part-time beginner cohort subsets. This and other reports are available via our website at <http://www.indiana.edu/~rrlilly>.

To protect student privacy, cells with a "began" number of ten or less are masked. As always, your comments and suggestions are welcomed.
