

This report provides views on the 2002, 2003, and 2004 incoming student cohorts' persistence to the second year. The format of this report focuses on beginners who were full-time in their first fall semester. Reports for all beginners, and part-time beginners are available at our website.

The logic for defining incoming student cohorts is consistent across the years represented. Exclusions to the cohort for military service or death are added to the standard report view. Managing and accomodating these exclusions will provide a more accurate view of persistence but may also change previously published figures. To provide context to the retention rates by cohort, a five year average is included for each of the data views.

In order to protect student privacy, cells with a "began" number of ten or less are masked.

Comments and suggestions are welcomed.
